

Himadri Summer Campaign Overview (Sample)

Himadri Summer Campaign Overview. This fictional overview covers an 18-day campaign at Ny-Ålesund in June and July 2025. The team completed 3 fjord transects by small boat and logged weather observations twice daily.

Outreach during the campaign included 2 live video calls with schools in India. Water samples were stored at 4 °C before shipment. All data sheets were digitised at the end of each week.
