

Southern Ocean Transect Cruise Summary (Sample)

Southern Ocean Transect Cruise Summary. This fictional summary describes a ship-based transect from 20 December 2024 to 10 February 2025. The science team completed 42 CTD casts measuring temperature, salinity and depth.

SAMPLE

Plankton nets were deployed at 15 stations and krill were observed in several net hauls. Rough sea states on 6 days delayed deck operations. Samples were preserved for later laboratory analysis.

SAMPLE
